Profile

Graduate data scientist, AI researcher, and technology professional completing M.S. degrees in Data Science and Teaching Computer Science K–12 in December 2026. Brings more than ten years of engineering and data-systems experience, including reliable analytics workflows, machine learning, requirements clarification, quality validation, documentation, and cross-functional delivery. Strongest fit: Data & Business Analysis, with supporting AI and project-coordination experience.

Technical and Delivery Skills

Programming	Python, SQL, R, Java, C++, C#, JavaScript, Bash, MATLAB
Analytics and AI	pandas, NumPy, SciPy, scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, statistics, feature engineering, model evaluation
Data workflows	ETL, data modeling, ingestion, cleaning, transformation, validation, PostgreSQL, MySQL, visualization and reporting
Delivery	Requirements clarification, task tracking, stakeholder communication, technical documentation, Git/GitHub, AWS, GCP, Docker, Linux

Relevant Experience

Graduate Assistant, Quantum and AI Research <i>Rochester Institute of Technology, Software Engineering</i>	Fall 2025–Present <i>Rochester, NY</i>
- Build Python evaluation workflows for adaptive quantum-network routing with shared datasets, automated validation, structured logging, experiment tracking, and technical reporting. - Translate research requirements and large experimental outputs into comparison-ready analyses, visualizations, and documented evidence.	
Data Solutions Engineer <i>VEDADATA Inc.</i>	Sep 2022–Aug 2024 <i>New York, NY</i>
- Designed maintainable SQL, Python, and pandas workflows for ingestion, cleaning, transformation, validation, and analytics-ready delivery. - Coordinated requirements, quality checks, documentation, and result reviews across technical and nontechnical collaborators.	
AI Data Solutions Engineer <i>VIOME Inc.</i>	Jan 2021–Sep 2022 <i>New York, NY</i>
Developed healthcare machine-learning workflows spanning preprocessing, feature engineering, model experimentation, evaluation, and AWS-oriented data preparation.	
Senior Systems Engineer, Data Platform <i>The NPD Group, Inc.</i>	Jun 2019–Jan 2021 <i>New York, NY</i>
Designed data structures, ETL processes, analytics applications, and automated testing; collaborated on integration, documentation, deployment, and backlog clarification.	
Senior Systems Engineer, Data and Machine Learning <i>Insticator Inc.</i>	Sep 2017–Mar 2019 <i>New York, NY</i>
Built data pipelines, APIs, reporting tools, and recommendation/NLP systems supporting data-science and advertising-operations work.	

Selected Applied Work

Diabetic Readmission Prediction. Prepared and modeled a multi-hospital dataset using structured preprocessing, feature engineering, model comparison, and performance evaluation. **Reproducible Research Evaluation.** Build validation and reporting workflows that turn heterogeneous experiment outputs into comparison-ready datasets and reusable artifacts.

Education

M.S., Data Science , Rochester Institute of Technology	Expected Dec 2026
M.S., Teaching Computer Science K–12 , University of Rochester	Expected Dec 2026
NSF Robert Noyce Scholar; inclusive technical communication and assessment	
M.S., Computer Science , Rochester Institute of Technology	2015
Artificial intelligence, big data analytics, and computer graphics	
Dual B.S., Electrical Engineering Technology and Computer Engineering Technology , Farmingdale State College	2012
