Summary

Data analyst completing M.S. degrees in Data Science and Teaching Computer Science K–12 in December 2026, with industry and research experience building reliable data workflows. Experienced in SQL, Python, R, large and heterogeneous datasets, data cleaning and validation, reproducible analysis, documentation, and communicating findings to technical and nontechnical collaborators. Brings K–12 teaching experience and a practical understanding of how data quality, definitions, and limitations affect educators and learners.

Technical Skills

Programming	SQL, Python, R, Java, C++, C#, JavaScript, Bash, MATLAB
Data workflows	pandas, NumPy, SciPy, data cleaning, transformation, validation, feature engineering, statistical analysis
Quality and reporting	Automated checks, structured logging, reproducible pipelines, technical documentation, Matplotlib, Plotly, Seaborn
Research and education	Research specifications, experiment evaluation, formative assessment, UDL-informed instruction, stakeholder communication
Systems	PostgreSQL, MySQL, AWS, GCP, Docker, Git/GitHub, Linux/Unix

Relevant Experience

Graduate Assistant, Quantum and AI Research <i>Rochester Institute of Technology, Software Engineering</i>	Aug 2025–Present Rochester, NY
- Build Python analysis and evaluation workflows for adaptive decision systems using automated validation, structured logging, shared datasets, and reproducible experiment tracking. - Translate research requirements and large experimental outputs into comparison-ready datasets, visualizations, technical reports, and manuscript-ready evidence.	
Data Solutions Engineer <i>VEDADATA Inc.</i>	Sep 2022–Aug 2024 New York, NY
- Designed maintainable SQL, Python, and pandas workflows for data ingestion, cleaning, preprocessing, validation, and analytics-ready delivery. - Built quality checks and diagnostics for missing, inconsistent, and unusual information; documented findings and data processes for technical and nontechnical collaborators.	
AI Data Solutions Engineer <i>VIOME Inc.</i>	Jan 2021–Sep 2022 New York, NY
Developed healthcare-oriented machine-learning workflows spanning preprocessing, feature engineering, model experimentation, evaluation, and deployment-oriented data preparation in AWS environments.	
Computer Science Teacher Candidate <i>University of Rochester / Pine Brook Elementary School</i>	Feb 2026–May 2026 Rochester, NY
Used formative checks and student participation evidence to adjust accessible K–5 computer-science instruction, grouping, pacing, and supports.	
Environmental Science Camp Teacher <i>University of Rochester / Freedom Scholars</i>	Jul 2026 Rochester, NY
Delivered inquiry-based science activities and adapted instruction in response to student understanding and engagement.	

Selected Data and Research Work

Reproducible Analysis and Reporting. Built validation and reporting workflows that convert heterogeneous experiment outputs into comparison-ready datasets, diagnostics, and reusable artifacts.

Diabetic Readmission Prediction. Prepared and modeled a multi-hospital dataset using structured preprocessing, feature engineering, model comparison, and performance evaluation.

Education

M.S., Data Science , Rochester Institute of Technology GPA: 3.9+; applied AI, bioinformatics, statistics, and reproducible data systems	Expected December 2026
M.S., Teaching Computer Science K–12 , University of Rochester GPA: 3.9+; NSF Robert Noyce Scholar; inclusive instruction and assessment	Expected December 2026
M.S., Computer Science , Rochester Institute of Technology Artificial intelligence, big data analytics, and computer graphics	2015
Dual B.S., Computer and Electrical Engineering Technology , Farmingdale State College	2012
