Profile

Computer science educator and applied AI professional preparing to teach, advise, and mentor students in a K–12 independent-school community. Brings K–5 student-teaching experience, graduate preparation in inclusive computer science education, and industry experience building software, machine-learning, and data systems. Designs technically rigorous learning with multiple ways for students to participate, communicate, debug, and demonstrate understanding.

Teaching and Mentoring Experience

Computer Science Student Teacher

Spring 2026

University of Rochester / Pine Brook Elementary School

Rochester, NY

- Supported and increasingly led computer-science learning across kindergarten through fifth grade using coding, robotics, Sphero, Minecraft Education, Tinkercad, Code.org, circuits, digital fluency, and student-designed AI projects.
- Designed and revised lessons, directions, rubrics, and formative assessments using computer-science standards and Universal Design for Learning.
- Used visual, hands-on, and discussion-based supports to preserve learner agency and help students with varied communication, attention, confidence, and prior technical experience participate in rigorous work.

Tutor and Mentor

Ongoing

Computer Science, Data Science, Statistics, and Mathematics

Rochester, NY

- Explain technical concepts through examples, diagrams, guided practice, and patient debugging, including support for neurodivergent and underrepresented learners.
- Help learners organize complex assignments, interpret feedback, and build confidence while maintaining responsibility for their own work.

Graduate Assistant, Quantum and AI Research

Fall 2025–Present

Rochester Institute of Technology, Software Engineering

Rochester, NY

- Build and document reproducible Python experiments in adaptive quantum-network routing, online learning, fairness, and resource allocation.
- Translate complex methods and findings into reports, presentations, visual explanations, and reusable project materials for varied audiences.

Applied Technical Experience

Data Solutions Engineer

Sep 2022–Aug 2024

VEDADATA Inc.

New York, NY

- Built maintainable Python data workflows, validation checks, and documentation while collaborating with technical and nontechnical teams.

AI Data Solutions Engineer

Jan 2021–Sep 2022

VIOME Inc.

New York, NY

- Developed and evaluated machine-learning workflows for healthcare data, connecting technical decisions with reliability, communication, and user impact.

Education

M.S., Teaching Computer Science K–12, University of Rochester

Expected December 2026

GPA: 3.9+; NSF Robert Noyce Scholar; Advanced Certificate in Leadership in Disability and Inclusive Practices

M.S., Data Science, Rochester Institute of Technology

Expected December 2026

GPA: 3.9+; applied AI, bioinformatics, neural networks, and reproducible data systems

M.S., Computer Science, Rochester Institute of Technology

2015

Artificial intelligence, big-data analytics, and computer graphics

B.S., Electrical Engineering Technology; B.S., Computer Engineering Technology, Farmingdale State College

2012

Teaching and Technical Strengths

Computer science and interdisciplinary STEM | Inclusive lesson and assessment design | Advising and mentoring | Python, Java, C++, JavaScript, SQL, R, Git/GitHub, Jupyter, and LaTeX
