github.com/pzg8794 | garciapiterz.com

Graduate educator and applied AI professional with experience designing standards-aligned K–12 instruction in computer science, robotics, digital fluency, mathematics, and responsible AI. Combines inclusive teaching, curriculum development, technical writing, and graduate research in data science and machine learning. Comfortable developing, reviewing, and revising learner-centered content in distributed, technology-enabled teams.

Subject areas	Computer science, mathematics, data science, AI, robotics, digital literacy, and interdisciplinary STEM
Curriculum	Standards alignment, lesson and activity design, assessment development, content review, scaffolding, feedback cycles
Inclusive practice	Universal Design for Learning, disability inclusion, accessible communication, equitable participation
Technical tools	Python, SQL, R, Java, C++, JavaScript, Git/GitHub, Jupyter, LaTeX, learning and collaboration platforms
AI and data	Machine learning, model evaluation, data preparation, reproducible experimentation, responsible and fairness-aware AI

Subject areas	Computer science, mathematics, data science, AI, robotics, digital literacy, and interdisciplinary STEM
Curriculum	Standards alignment, lesson and activity design, assessment development, content review, scaffolding, feedback cycles

Inclusive practice Universal Design for Learning, disability inclusion, accessible communication, equitable participation

Technical tools Python, SQL, R, Java, C++, JavaScript, Git/GitHub, Jupyter, LaTeX, learning and collaboration platforms

AI and data	Machine learning, model evaluation, data preparation, reproducible experimentation, responsible and fairness-aware AI

Computer Science Teacher Candidate

2025–Present

2025–Present

Rochester, NY

- Co-design and facilitate standards-aligned learning in coding, robotics, digital fluency, mathematics, and responsible AI for varied K–12 learners.
- Develop lessons, activities, prompts, and assessments using Universal Design for Learning supports and revise materials from learner and mentor feedback.
- Translate technical ideas into clear explanations, examples, and hands-on experiences that support multiple ways of engaging and showing understanding.

Fall 2025–Present

Rochester, NY

- Build and document Python experiments for adaptive quantum-network routing, online learning, and resource allocation.
- Review technical results for accuracy, create reproducible comparison-ready artifacts, and communicate complex methods through reports, presentations, and manuscript-ready materials.

Data Solutions Engineer Sep 2022–Aug 2024

Sep 2022–Aug 2024

New York, NY

- Collaborated across technical and nontechnical teams to clarify requirements, review outputs, and improve reliability and usability.

Jan 2021–Sep 2022

New York, NY

- Developed machine-learning workflows for healthcare use cases, including preprocessing, feature engineering, supervised-model experimentation, evaluation, and clear reporting.

M.S., Teaching Computer Science K-12, University of Rochester
Expected December 2026

Expected December 2026

M.S., Data Science, Rochester Institute of Technology

Expected December 2026

M.S., Computer Science, Rochester Institute of Technology

2015

B.S., Computer Engineering Technology, Farmingdale State College

D.S., Computer Engineering Technology, Farmingdale State College 2012

NSF Robert Noyce Scholar (2024–2026) | IEEE Alumni Member (2009–Present) | RIT/MESCYT merit-based graduate funding

$$0 \rightarrow \mathcal{O}_X(-n) \xrightarrow{\gamma} \mathcal{O}_X(-n+1) \xrightarrow{\gamma} \cdots \xrightarrow{\gamma} \mathcal{O}_X(0) = \mathcal{O}_X \rightarrow \mathcal{O}_Y \rightarrow 0$$
