Summary

Healthcare data scientist and machine-learning practitioner completing an M.S. in Data Science in December 2026, with industry experience building Python analytics, data pipelines, and machine-learning workflows in healthcare and production environments. Experienced in healthcare predictive modeling, statistical analysis, data preparation and validation, visualization, reproducible evaluation, and communicating technical findings to varied stakeholders.

Technical Skills

Programming	Python, SQL, R, Java, C++, C#, JavaScript, Bash, MATLAB
Data and ML	pandas, NumPy, SciPy, scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, statistical modeling, feature engineering, model evaluation
Visualization	Matplotlib, Plotly, Seaborn, technical reporting, stakeholder presentations
Healthcare	Healthcare machine learning, hospital-readmission analytics, bioinformatics, clinical-data research, responsible and fairness-aware AI
Systems	AWS, GCP, Docker, Git/GitHub, Linux/Unix, reproducible data workflows, structured logging

Relevant Experience

Graduate Assistant, Quantum and AI Research Fall 2025–Present
Rochester Institute of Technology, Software Engineering *Rochester, NY*
- Build Python evaluation workflows for adaptive decision systems, including automated validation, structured logging, shared datasets, and reproducible experiment tracking.
- Translate complex requirements and large-scale results into benchmark analyses, visualizations, technical reports, and manuscript-ready artifacts.

Data Solutions Engineer Sep 2022–Aug 2024
VEDADATA Inc. *New York, NY*
- Designed maintainable Python and pandas workflows for data ingestion, cleaning, preprocessing, validation, and analytics-ready delivery.
- Built quality checks and statistical diagnostics to identify missing, inconsistent, and unusual information in production data workflows.
- Collaborated across technical and nontechnical teams to clarify requirements, document findings, and improve system reliability.

AI Data Solutions Engineer Jan 2021–Sep 2022
VIOME Inc. *New York, NY*
- Developed healthcare-oriented machine-learning workflows for preprocessing, feature engineering, supervised-model experimentation, and evaluation.
- Supported reproducible analytics and deployment-oriented data preparation in AWS environments for predictive health applications.

Computer Science Teacher Candidate Feb 2026–May 2026
University of Rochester / Pine Brook Elementary School *Rochester, NY*
- Co-designed accessible technical learning and communicated complex ideas through multiple formats for learners and collaborators with varied needs.

Selected Healthcare and Data Projects

Diabetic Readmission Prediction. Compared ensemble and regularized regression methods for clinical risk stratification using structured preprocessing, evaluation, and interpretation.
Fairness-Aware Bioinformatics and Healthcare Analytics. Connected RNA-focused computational workflows, predictive modeling, and fairness assessment to evaluate technical performance and equitable outcomes.
Reproducible Data-System Evaluation. Built validation and reporting workflows that convert heterogeneous experiment outputs into comparison-ready datasets, diagnostics, and stakeholder-facing artifacts.

Education

M.S., Data Science, Rochester Institute of Technology Expected December 2026
GPA: 3.9+; applied AI, bioinformatics, neural networks, and reproducible data systems
M.S., Teaching Computer Science K–12, University of Rochester Expected December 2026
GPA: 3.9+; NSF Robert Noyce Scholar; advanced certificates in teaching students with disabilities and digitally rich teaching
M.S., Computer Science, Rochester Institute of Technology 2015
Artificial intelligence, big data analytics, and computer graphics
Dual B.S., Computer and Electrical Engineering Technology, Farmingdale State College 2012
